

Proven Teaching Techniques

Excellerated Programs are able to produce dramatic changes in peoples' lives because of our revolutionary teaching technology.

Traditional educational environments, typically bombard you with data, and motivate learning via individual competition, “who’s smarter than who” and the fear of failure.

We begin the process of learning, by removing the fear of failure and past mistakes. When past mistakes are converted into “learning experiences,” wisdom, relief and joy often follow. Learning and mistakes become a transformational experience — not a fearful one.

You will learn faster, by making mistakes in the *Excellerated* learning environment to succeed sooner.

Think of it as a business simulation, a real-life ride at Disney World. You'll love the way you learn!

Our instructors are charismatic and inspirational. They have proven themselves and are successful in business and in life. You will see, feel and experientially be “touched” by their teachings. Action Tools are used to aid in information retention and retrieval

You learn more, in less time and won't forget.

We incorporate the three elements of high-speed (*Excellerated*) learning:

Emotional and Subconscious Learning: Involving you through feelings of joy, fear, sorrow, love, compassion and exultation.

Physical Learning: Hands-on experience, involving all your senses, engaging your nervous system.

Mental Learning: Memorized facts, consisting of storing facts and data in your brain, similar to filing data in your computer.
